## PROFESSIONAL SUMMARY

---

Detail-oriented and analytical Computer Science Engineering student (CGPA: 8.69/10) with hands-on experience in data engineering, predictive modeling, and business intelligence. Proficient in transforming raw, large-scale datasets into actionable insights using Python, SQL, and Power BI. Proven track record of developing end-to-end analytics pipelines, detecting data anomalies, and building automated reporting systems. Strong communicator adept at translating complex data findings into strategic business recommendations for cross-functional stakeholders.

## EDUCATION

---

**Amity University Punjab**, Mohali

Bachelor of Technology (B Tech) in Computer Science & Engineering | *CGPA: 8.69 / 10.*

*Expected Graduation: June 2027*

**GGMSSS**, Chandigarh

Class XII (CBSE) | *Percentage: 89.6%*

## TECHNICAL SKILLS

---

- **Languages & Core Analytics:** Python (Pandas, NumPy, Scikit-learn, XGBoost, CatBoost), SQL (Advanced), JavaScript, Excel (Advanced)
- **Business Intelligence & Visualization:** Microsoft Power BI, Looker Studio, Matplotlib, Data Storytelling
- **Databases & Tools:** PostgreSQL, MySQL, MongoDB, Git, GitHub, Jira Atlassian
- **Core Competencies:** Statistical Analysis, Time-Series Forecasting (ARIMA, Prophet), Predictive Modeling, Exploratory Data Analysis (EDA), Data Cleansing & Transformation, KPI Generation, Anomaly Detection

## ACADEMIC & TECHNICAL PROJECTS

---

**AI-Driven Business Intelligence System with Generative AI** | *Python, Power BI, Groq API, Machine Learning*

- Developed an end-to-end Business Intelligence platform that automates sales data preprocessing, KPI generation, and interactive dashboarding.
- Implemented predictive analytics using Machine Learning (XGBoost, CatBoost) and Time-Series models (ARIMA, Prophet) to forecast sales trends and isolate operational anomalies.
- Integrated the Groq API (LLM) to automatically interpret statistical data and generate structured, natural-language business intelligence reports for leadership.

**Trade Reconciliation & Exception Detection System** | *SQL, Python, Power BI*

- Simulated a financial operations pipeline by building a system to reconcile high-volume trade records across disparate, multi-source databases.
- Applied advanced SQL queries and Python scripts to systematically audit data integrity, flagging mismatches in pricing, quantity, and status.
- Designed an actionable executive dashboard in Power BI to monitor real-time exception resolution metrics and pipeline risks.

**Cash & Collateral Management Tracker** | *PostgreSQL, Python, Power BI*

- Designed and optimized a relational PostgreSQL data model capable of handling and structuring 100K+ transactional records.
- Automated variance calculations and embedded custom SQL logic to isolate statistical anomalies and trends.

## WORK & LEADERSHIP EXPERIENCE

---

### AI/ML Intern

Jun – Aug 2025

*India Meteorological Department (IMD)* | New Delhi, India

- Processed and optimized high-volume time-series datasets, ensuring 100% data integrity and system reliability during complex testing phases.
- Performed rigorous model validation and statistical debugging to troubleshoot software defects and optimize application algorithmic precision.
- Authored structured technical documentation and reporting pipelines, aligning workflows with enterprise software compliance and coding standards.

### Data Analyst Associate Intern

Jul – Aug 2025

*Excelerate* | Remote

- Designed, built, and structured complex relational database tables using PostgreSQL, integrating clean data layers to support scalable application components.
- Developed automated dashboards and exception-identification scripts to systematically test, debug, and monitor application KPIs.
- Collaborated actively with cross-functional technical teams to translate raw business requirements into structured software problem-solving blueprints.

## CERTIFICATIONS & KEY ACCOMPLISHMENTS

---

- Data Visualization: Empowering Business with Effective Insights | Tata (Job Simulation)
- Power BI Job Simulation | PwC
- Data Analysis Using Excel | Great Learning
- AWS Academy – Cloud Foundations
- Finalist, Cyberthon.ai (National-level hackathon organized by Infosys and Chandigarh Police, 2025)
